

**Liner Design Certification**  
**40 CFR 257.107 (f)(3)**

The F.B. Culley West Pond posted a Notice of Intent to Initiate Closure for an Inactive Surface Impoundment in December 2015. This NOI signaled the start of closure and preliminary dewatering activities were initiated. Subsequently, a Closure Permit Application has been submitted to IDEM for review and approval. Therefore, since the pond has already initiated closure, the Liner Design Certification is no longer applicable.
